**KEYWORDS:-**Age women understand the social conditions of old age homes.

#### Introduction:

The life of common aged women is bound with lots of social and economic problems in the day-to-day life. Most of the woman are physically and mentally disturbed and this leads to poor eye-sight. Only few woman of this age are leading a fruitful or happy life. Whereas the rest of the woman are leading a life filled with loneliness. Sickness, misery, cruelty, sadness and self-humility. To overcome all this, they give up their choice of living happily and decide's to spend their life praying I.e., getting devoted to godliness. The women who are disappointed with their life try to overcome by educating their siblings. To the at most level. They encourage them to pursue good knowledge and to achieve a good place in society.

Few woman take to up the challenge to up bring their sibling and grandchildren in to the top most level, no matter even if she has to take up their problems. Which are stress giving to her She tries to overcome all this and encourages them timely. These activities of her gains good respect in the heart of these society.

#### Objectives:

- To find out verification in the ages.
- To analyze the literacy level.
- To analyze the original natives of Bangalore as many are from different states.
- To examine the percentage in every religion.

- To examine the individual living/widows percentage.

### Methodology:

To study the valusability of aged women in term of socially. Collection of primary data and Secondary data. Preparation of questioner and survey (field work). 170 aged women were from 22 old age homes, managed by both the Government and the trusts including NGOs.

As per the research done through the field work we have collected few such information's.

These information's are explained here in the table.

**Table 1. Verification of old Age people.**

8	Post Graduated	05	02.94
9	Total	170	100.00

The educated woman shows matured behavioral patterns that relates to good values of life. They try to overcome all kinds of negative aspects through education, Whereas, the uneducated woman lacks interest to combat with negative aspects and takes every aspects very serious mind which brings lots of stress leading to various kinds of health issues.

The rate of education level in woman of age 60 years is more in number. The percentage varies as 65.28% in urban areas, and they belong to educated family.

**Table 3. Proper place Information.**

Sl No	States	Districts	Number	%
1	Karnataka	18 Districts	143	84.30
2	Tamilnadu	Chennai, Madurai	18	10.58
3	Kerala	Perambur, Kerala	04	02.15
4	Maharashtra	Pune, Bombay	02	01.17
5	Gujarat	Gujarat	01	00.58
6	Simandra	Nellore	01	00.58
7	Odessa	Balsor	01	00.58
8	Total		170	100.00

Around 55.88% of old aged women are found in Old Aged Homes. They come from different areas, cities and towns to Bengaluru. Around 28.23% of old aged women are found in all over in Karnataka from 18 districts.

Finally Karnataka ranks with 84.30% Old Aged Women. Other states of India consists of 15.64% of old age women. Most of the women come from different states to Bengaluru to Old Age Homes, because of good climatic conditions.

**Table 4. Religious Information.**

Sl No	Religion	Number	%
1	Hindu	145	85.30
2	Cristian	24	14.12
3	Muslim	01	00.58
4	Total	170	100.00

Percentage of Old Age Women religion wise: As we all know that India is known for secularism, as many types of religion bond to together for unity, But the poor status of women plight, is found in every religion except Muslim.

The reasons for women in the worst Hindus Circumstances of are as follows:1. Unmarried women (virgin).

2. Women without children -85.30%.

**Table 5. Women living in Old Age Homes.**

Sl No	Paid & Unpaid	Number	%
1	Paid	104	61.18
2	Unpaid	66	38.82
3	Total	170	100.00

Women living in old age homes are not affordable to pay the allowance. As there is great hike in tariff, due to the upcoming demands related to comfort ability. Compared to ten years, old age homes have now increased to, A great level. As there is great demand in society.

Few Old Age Homes are organized for business purpose and not as a social institution. Whereas few old age home are meant for social service, such institutions genuinely prove their service towards the needy women. Who has come across various negative tortures of society Among the 22 old age homes 104 women are affordable to pay their allowance, and the percentage is 61.18%. As monthly amount as advanced will be paid by few women and few pay on monthly basis for their service.

The women who are not affordable to pay there are 38.82%. Few of the government aided association are providing free facility to old age women.

**Table 6. Aged Women husband Information.**

Sl No	Husband information	Number	%
1	Expired	122	71.80
2	Having ex wife	04	02.35
3	Living alone	07	04.11
4	Living together in OAH	06	03.52
5	Living with children	02	01.17
6	Unmarried	25	14.70
7	Husband has divorced wife	04	02.35
8	Total	170	100.00

(OAH:OLD AGE HOMES)

The above table verifies the different situations a women faces in life.

**Table 6. Women (bearing) having children's and not bearing children's.**

Sl No	Information about children	Number	%
1	Those women who are having children	99	68.27
2	The women who do not have children	46	31.73
3	Total	145	100.00

This is an shocking information when we come cross that the variation of women who are not having children have to survive and take support in old age home. And such women living old age home percent is less-i.e., 31.73 where as women who are having children have to forcibly live in OAH. As they have to face a lot of stress giving problems from their own siblings. And they rank there highest percentage in OAH-68.27%.

In the research information we can see various reasons resulting the women to live in old age homes now-a-days in this unclears life style, social interactions are very less and people are not having enough time to consecrate with each other.

### **Conclusion:**

These women in Bengaluru leave to face various kind of problems related to social financial ups and downs. These women find peace and prosperity in old age home than their own homes. With the declining position of joint families due mainly to industrialization and urbanization, institutional arrangements for the elderly population seems to become imperative in the coming years.
