Abstract

The purpose of the study was to assess and consolidates the achievements of the University of Madras South Zone and All Inter University sports and games for Men and Women from 2000 and 2001. The survey method was used in the study. The researcher referred available records in the University of Madras and also the researcher followed a combination of interview cum questionnaire method from Director of physical Education and Coaches. The Questionnaires were designed with a view of getting information on hand as primary data. No secondary sources and indirect means were adapted so as to get only first hand information and collected data from directly. Even though it is considered as a case study there are some numerous findings and chronological facts available on the basis of the facts the fundamental descriptive statistical tools like diagrammatical representation was employed.

The data were analyzed. Finally the particulars were tabulated for all games in Men and Women on the success percentage were calculated.

KEY WORDS: University of Madras, Inter University Sports and Games, Education Performance

Introduction

Man is the most intelligent and admirable being among the creation of God. The development of the country is in hands of educational Institutions. Ultimately it should help young people keep physically fit and enjoy many forms of physical activity during the school years and continuing throughout life.

Swami Vivekananda said that education is the manifestation of perfection which is already in man. Physical education is an integral part of the total education process and aims for the development of physically, mentally, emotionally and socially fit citizens. During 1932 nearly 36 teams of Madras University both Man and women take part in the South Zone and All India Inter University tournaments every year. Recently University has been divided in to two men and women zones. University of Madras teams are selected during the Inter zonal tournaments.

Methodology

For the present study the researcher found out the sports and games achievements of the University of Madras in the South Zone and All India Inter University competition from 2000 and 2001.

The purposes of this study analyze the status of the sports and games of the University of Madras. The survey method was used in the study. The researcher

referred available records in the University of Madras and also the researcher followed a combination of interview cum questionnaire method form Director of Physical Education and Coaches. Questionnaires were designed with a view of getting information on hand as primary data. No secondary resources and indirect means were adopted as to get only first hand information and collected data from the source directly.

The researcher gone through various sources to get all information pertaining the status of the University of Madras sports and games for the Men and Women.

MEN

Performance of University of Madras Men Teams in South Zone Inter University Competitions in the year 2000

TABLE -I

Total no. of events/games participated	Placing in South zone					Percentage of success in each place				Total percentage of success in I-IV places
	Basket Ball	Badminton	Tennis	Hockey	Cricket	I	II	III	IV	
18	III	III	III	I	I	11.11	0	16.66	0	27.77

Table 1 shows that among the 18 teams participated in the South Zone inter university tournaments for the year 2000, basketball, badminton, and tennis teams secured third place and hockey and cricket secured first place. The percentage of success in 1st place, 2nd place, 3rd place and 4th place are 11.11%, 0%, 16.66% and 0% respectively. The overall percentage of success in south zone inter university tournament for year 2000 is 27.77%.

Performance of University of Madras Men Teams All India Inter University Competitions in the year 2000

TABLE - II

Total no. of events /games participated	Placing in All India					Percentage of success in each place				Total percentage of success in I-IV places
	Basket Ball	Ball Badminton	Tennis	Table tennis	Row-ing	I	II	III	IV	
18	I	II	I	I	III	16.66	5.55	5.55	0	27.77

Table II shows that among the 18 teams participated in the All India Inter University tournaments for the year 2000, basketball, table tennis and tennis s teams secured first place and ball badminton team secured second place and rowing team secured third place. The percentage of success in 1st place, 2nd place, 3rd place and 4th place are 16.66%, 5.55%, 5.55% and 0% respectively. The overall percentage of success in all India inter university tournament for year 2000 is 27.77%.

Performance of University of Madras Men Teams in South Zone Inter University Competitions in the year 2001

TABLE - III

Total no. of events /games participated	Placing in South zone		Percentage of success in each place	Total percentage of success in I-IV places

18	Basket ball	Kabaddi	Cricket	I	II	III	IV	16.66
	I	II	II	5.55	11.11	0	0	

Table III shows that among the 18 teams participated in the South Zone Inter University tournaments for the year 2001, Basketball team secured first place and Kabaddi, and Cricket teams secured Second place. The percentage of success in 1st place, 2nd place, 3rd place and 4th place are 5.55%, 11.11%, 0% and 0% respectively. The overall percentage of success in south zone inter university tournament for year 2001 is 16.66%.

Performance of University of Madras Men Teams in All India Inter University Competitions in the year 2001

TABLE - IV

Total no. of events /games participated	Placing in All India		Percentage of success in each place				Total percentage of success in I-IV places
	Basket ball	Ball Badminton	I	II	III	IV	
18	Basket ball	Ball Badminton	I	II	III	IV	11.11

	III	III	0	0	11.11	0	
--	-----	-----	---	---	-------	---	--

Table IV shows that among the 18 teams participated in the All India Inter University tournaments for the year 2001, basketball, and ball badminton teams secured third place. The percentage of success in 1st place, 2nd place, 3rd place and 4th place are 0%, 0%, 11.11% and 0%. The overall percentage of success in all India inter university tournament for year 2001 is 11.11%.

Volley ball team secured third place in the year 2000 and second place in the year 2001. Ball Badminton team got second place in 2000. Tennis team placed first in the year 2001.

Bar diagram showing the 1st, 2nd, 3rd and 4th places won by University of Madras Women team in various games/sports in All India Inter University tournaments between 2000 and 2001

FIGURE - II

Bar diagram IV show the places won by respective Women team All India Inter University tournaments. Basket ball team secured first place in both 2000 and third place in the year 2001. Table tennis team won first place in the year 2000 as well as 2001. Volley ball team won third and second place in the year 2000 and 2001. Tennis team won second place in the year 2000 and first place in the year 2001. Ball Badminton won third place in 2000 and Rowing team secured third place in the year 2001.

Conclusion

The following conclusion was drawn taking into consideration of the

1. Its contributions have been outstanding at national and International levels.
2. The results show there is a consistent amount of performance every year.
3. There has been a consistent inflow of trainees in to the training period.
4. There is enough opportunity to develop individual sports.
5. University of Madras has been directly or indirectly building solitarily among the people of the local area through sports.
6. Many have taken sports and games as their profession and have succeeded in setting with their job.

7. The University of Madras leading from the forefront in games and sports.
8. In times the University Of Madras physical Education Department is rich and does the service oriented activities to sports and games.

Reference

1. Bucher (1967) while prescribing the ratio in play fields expresses, the size of the play ground area should be determined on the bases of the activities offered in the programme and number who will be using the facilities at peak.
2. James (1990) conducted a study on, an analytical study of physical education and sports, as revealed in the Pondicherry university, he concluded inadequate facilities in the field of physical education in the outlying region also inhibit the development, and facilities may not be made available to the sportsmen for regular training.
3. Humphery (1946) states, "one of the most important single factors in establishing a well-balanced programme of activities is that of teaching personnel".
4. Krishnan (1982) conducted a study on physical education facilities for pupils in some high schools in Madras city. The data was collected through a questionnaire from 25 out of 36 girls school and 30 out of 66 boys schools. Results showed that only a very few schools were having all kinds of required facilities and the below the standard.
5. Mathew (1990) conducted a study on the contribution of Mahatma Gandhi University to women hockey. She stated that the sports hostel facility under the university was an additional advantage to the university to improve the standard of the game as well as the players.
6. Mellory (1962) studied that physical education programme for women institution of higher learning in three North West States of America. He found that in all the twenty two institutions were better in all aspects than the private institutions. But they were lacking in participation and achievements in extramural programme.
7. Parameswara Kumar (1988) did a study on the contribution of University of Kerala in the field of Volley Ball from 1971 to 1987. His study was limited to only one University in Kerala. He also discussed about the facilities available in the University of Kerala. This study reveals that the constitution of Kerala University in the field of Volley Ball was very great one.
8. Professional objectives are essential in physical education so that practitioner may know the goal towards which they are directing their programmes to participants, simply stated objectives are goals or desired outcome that can be realized through participation in a sound physical education programme. Bucher (1976)
9. Shane Collins (2008) explains National sports development policy (across the mass-elite sports spectrum) in Australia and Finland, states that Sport development as a public policy priority has historically been on the periphery of government's political agendas. This is not the case in the early 21st century however.
10. Scott and Nest Kaempur (1958) are of opinion that "it is a well established fact that no form of educational facilities can be considered modern unless it amply provide for a wide and varied programmes of physical education".

11. The review of the literature understanding of the problem and its crucial aspects and ensures the avoidance of unnecessary duplication. It also provides a comparative data on the basis of which to evaluate and interpret the significance of one's findings. Mellor (1962).
12. Voltmer and Esslinger, (1949) are of the view that the college physical education programme should stress activities, that students will use and heed during adult life. If a students, leaves colleges without this preparation he never gets the chances again.
